

Cron - Now in Pakistan

Hangzhou CRON Machinery & Electronics Co., Ltd is a state-level high-tech enterprise committed to pre-press production research and manufacture. It is largest CTP maker in China at present. It is also the only domestic enterprise who is able to make thermal CTP, UV CTP, violet laser CTP and large format CTP products.

CRON has formed its own distinctive concept in CTP design and manufacture. It owns more than 20 patents and a number of national and provincial awards. It is qualified in ISO9001 quality management system, ISO14001 environmental management system certification and RoHS and CE international standard certificate. CRON has become leading enterprise in the field of CTP technology. CRON CTP not only has a good quality but also the sales volume is far ahead in domestic market. It's sales covers all over the world including Asia Pacific, EMEAR, North America and Latin America, more than 70 countries. It has won numerous international awards.

Customers' trust in CRON's products derives from CRON's innovation management concept, from its powerful strength and rich development experience, from its actively introducing and promoting international advanced technology, from its steady operation in past 20 years, from its help to customers in making profits with CRON's products and services.

Our philosophy is "Simplicity, Stability and Integrity". CRON will continue to keep the leading position in Chinese pre-press science and technology, to make a world famous brand of pre-press equipment, and to provide the most cost-effective CTP products for the majority of printing companies all over the world!

Cron products are now available in Pakistan through their authorized dealer, Unique Graphics Private Limited.

Javed Hayat of Unique Graphics with Jennifer Wang, Director Asia Pacific Region, LATAM Region at Cron Head Quarter in Hangzhou.
